[S1L] FIELD GUIDE

TILES SURVIVE · V3 · 28 SEP 2026 · SCHEDULES LIVE ON THE ALLIANCE BOARD IN GAME

[S1L] Field Guide · English version · 27/10/2026 · https://s1l-super-league.github.io/s1l-hub/guide.html

MADE WITH AI — PLEASE DOUBLE-CHECK

This guide was assembled with an AI assistant from [S1L]'s own event notes and in-game screenshots taken by our members. AI can be wrong even when it sounds certain. The strip under each heading shows how solid that section is. **If the game shows something different, the game is right** — post a screenshot in alliance chat so it can be fixed.

START HERE — THE 5 MINUTES THAT MATTER

☑ FROM PLAYERS ☑ TESTED IN GAME ☐ FROM THE INTERNET ☐ OFFICIAL SOURCE 15 Sep 2026

Almost everything in this game comes down to one idea: **spend the resources you were going to spend anyway on the day they count two or three times.** Not spending more — spending on the right day.

EVERY DAY, NO MATTER WHAT IS RUNNING

- **Do your Alliance Duel tasks** — every day the duel is running. This is where the largest, most reliable share of your points comes from.
- **Collect your duel chests.** The milestone rewards sit in the event window until you pick them up. They never arrive on their own, and an uncollected chest is the same as no chest.
- **Play Turbo Turtle up to 10 million when it runs and you can reach it.** That is the top milestone — it pays the prestige weapon fragment.
- Finish your daily tasks and collect the milestone chests.
- **Collect both free 50-stamina packs.** Always — they are free and they expire.
- Take the free gathering.
- Give alliance help and donate to alliance tech.
- **Keep a garrison on a goldmine.** The mine runs permanently, not as an event — gold comes in while you do other things.

These cost nothing, do not depend on winning anything, and are the most reliable points in the game.

STAMINA AND INTEL MISSIONS — DO NOT JUST BURN THEM

Stamina: collecting the two free packs is the daily habit. **Spending extra stamina out of your backpack belongs on duel day 1**, where stamina scores duel points — that is the day it counts twice.

Intel Missions: the duel rewards them on **days 1, 3 and 5** and on no other day, so there is no reason to run them in between. On any day, do the **level 10 wandering infected** — the first kill of the day carries the rewards that matter. Beyond that, either save your Intel Missions for the next scoring day, or run only as many as a special event actually needs.

THE FOUR MISTAKES THAT COST THE MOST

- **Spending your stacks on the wrong day.** Speed-ups, gear material, hero material and other stockpiles pay most on the day VS or Turbo Turtle scores them. Spent on any other day, the same stack scores nothing.
- **Treating Power Play as a third big event.** It is a small bonus you take along when it happens to fit — not something to plan your week around.
- **Sitting unshielded on duel day 6.** A weak unshielded base is free kill points for the enemy.
- **Attacking a target marked "do not attack".** It damages our relationships — and we need allies for Arcadia. If in doubt, ask first.

WHAT COMES FIRST WHEN TIME IS SHORT

TIER 1 — EVERY DAY — FREE AND GUARANTEED

daily tasks · both free stamina packs · free gathering · alliance help · tech donation · goldmine

▼

TIER 2 — VS — THE ALLIANCE DUEL

six days, 13 points, 7 wins the week — spend on the day that matches

▼

TIER 3 — TURBO TURTLE

gear, speed-ups and behemoths — but only on a phase that scores them

ALWAYS ON TOP

EVENTS

BEST REWARDS IN THE GAME

Oil Clash
Reservoir Raid
Arcadian Conquest
Alliance Siege
Ghoulion Pursuit
City Battle
Cave Conquest

never traded away for a tier

Tier 1 is never skipped — it costs nothing and needs nobody else. Tier 2 before tier 3: the duel is the week the alliance is judged on.

Events run on their own schedule. When one is live it outranks the whole ladder — that is where the best rewards in the game are.

If you only have ten minutes, work from the top down — the green band is the part nobody should ever skip. The violet column sits beside the whole ladder: a live event beats all three tiers, because that is where the best rewards are.

ONE HABIT THAT SEPARATES GOOD PLAYERS FROM STRONG ONES

Before you spend a stack of anything, ask: *is there a day this week where this same action pays twice?* Nine times out of ten there is. That is the whole game.

BASICS — HOW TO PLAY WELL

☑ FROM PLAYERS ☑ TESTED IN GAME ☑ FROM THE INTERNET ☐ OFFICIAL SOURCE

Game screens checked 28 Sep 2026 · tips from players marked by name

The events further down only pay off if your account grows in the right order. This chapter is the short version of that order — read it once, then use the rest of the guide to look things up.

Navigation: the settlement screen

Every button on the main screen, by number. Buttons 1–22 look the same in the wilderness. Private values are blurred.

Settlement screen (in game, 1 Oct 2026)

- **1** Profile picture — commander profile: power, state, skins, rankings, troops, settings.
- **2** Power — power ranking of the state.
- **3** VIP — VIP level and benefits. The free daily VIP chest is here.
- **4** Paper plane — opens an external web link in your browser.
- **5** Arrow pointing up — settlement buffs. Tab “Combat”: peace dome, anti-scouting, attack, defence, hospital. Tab “Development”: **gathering boost** and training capacity. How to use the gathering boost: box below.
- **6** Small icons next to it — your active buffs. Tap for the status overview with time left.
- **7** Resources — resource overview: stock and production per hour.
- **8** Gem chest — supplies: passes and packs for real money.
- **9** Event icons — they change with the calendar. Each opens what its label says (Season Festival, Events, Offers ...).
- **10** VS — the Alliance Duel: theme of the day, results, rankings.
- **11** Small dragon “S2” — season preview with countdown and rewards.
- **12** Shield with swords — Arcadian Conquest.

- **13** Two arrows — event checklist: daily tasks, hard dispatch, Doomsday Express, Underground Goldmine, Operation Ricochet and more, with tries left.
- **14** Radio — spy post.
- **15** Gift box with number — reward stash from raids. Collect everything here.
- **16** Medicine (wilderness screen) — hospital: heal wounded troops.
- **17** Book with task line — task book: daily tasks and growth tasks.
- **18** Speech bubbles — chat: state, alliance, private.
- **19** Cards — hero recruitment.
- **20** Envelope — mail.
- **21** Bottom bar, left — hero adventure, hero arena, Honor Expedition, 3v3 arena. Next to it: heroes, alliance, shops, backpack.
- **22** Bottom right — switch between settlement and wilderness.
- **27** Clock with moon or fork — daily schedule of your survivors: eat, rest, sleep, work.
- **28** 24/24 — survivors: who works in which building; quick assignment.
- **29** Hammer — building queues.
- **30** Flask — research slots.
- **31** Helmet — troop training in the barracks.
- **32** Hammer, right side — build menu: economy, military, exclusive.
- **33** Island icon, right side — tile mini-game with theme islands.
- **34** Icon with timer — the event running right now (changes).

GATHERING BOOST: BOOST FIRST, THEN GATHER

The boost only speeds up marches that start **after** you switch it on. Troops that are already out gathering keep their old speed. So switch the boost on first, then send your gatherers.

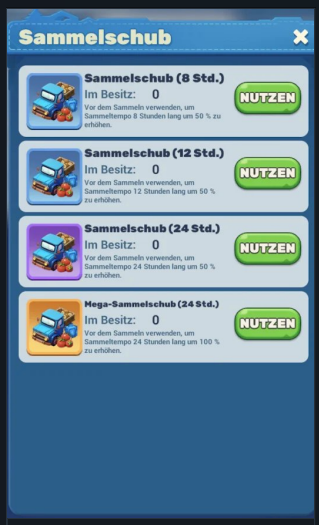

Way: arrow button at the top (5) → tab “Development” → “Gathering boost” → “View”. A green bar with time left means a boost is already running. Normal boosts give **+50 %** for 8, 12 or 24 hours. The Mega gathering boost gives **+100 % for 24 hours** and can be bought here at any time for 600 gems *(tip: Jac, S1L)*.

Arrow button at the top (5)

Tab “Development”: boost running, time left

Choice: +50 % or Mega +100 %

Building: the power plant sets the pace

- The **power plant** is your core building. Its level unlocks the next level of all other buildings, and each power plant level needs certain other buildings first — e.g. power plant 30 needs research lab 29, barracks 29 and war herald 26.
- **Do not let research fall behind.** The lab gives lasting bonuses — building and training speed, gathering, and your duel point bonus. A power plant rushed without research is strong on paper only. *(players: cosx, official server)*
- **Power plant 26 is a big step:** it unlocks troop level 9. *(player: Nick #190, official server)*
- Time your upgrades: finish buildings on **duel day 2** and research on **duel day 3** — see The week at a glance.

Heroes: few, but properly

- **Focus on squad 1 and raise it as a whole** instead of spreading fragments and manuals across many heroes. Rarity: gold (SSR) above purple (SR) above blue.
- Every hero has a **type** (icon on the card, e.g. shield or gun) and belongs to one of **three factions** — the three tabs in the hero list (mountain, sands, sky). The Honor Expedition battlefields match these factions, and reforged stats must fit the type.
- **Faction bonus:** put heroes of the **same faction** into one squad. The game shows it when you tap your heroes where they stand on the training grounds in your settlement (*Edit march*), then the faction icon. 2 of a kind give +2% final stats, 3 give +8%, 4 give +18%, **5 give +25%** (from 3+2 or 4 on also +5% counter-attack damage). Faction counters (mountain → sands → sky → mountain) add 20% damage; sea-voyage heroes count as every faction.
- Which heroes are worth it, and how prestige gear helps everyone: see Heroes and troops.

The faction effect screen (in game)

Troops and healing

- **Train on duel day 5** — training scores duel points there. Keep your barracks busy the rest of the week only if you are short of troops.

- **The healing trick:** start short healing jobs of 1–2 hours and ask for alliance help — with enough helpers the timer runs out almost at once. Do it together twice a day and your troops are back without speed-ups. *(player: AnesiShark, official server)*
- **Where troops really die:** in Oil / Copper Clash lost troops are gone (power lost). In Reservoir Raid they are only wounded and heal for free. So never trade troops against a much stronger enemy in a clash. *(players: FAMBAT, Nick #190, official server)*
- Before you dismiss troops, read the warning in Heroes and troops.

Gems, VIP and free gems

- **Log in every day.** The daily login gives VIP points, and the amount grows with your streak (on day 79 it is 650 points a day). Collect the free daily VIP chest.
- **VIP 8 gives an extra march slot** and more hero attack. Experienced players advise putting spare gems into VIP levels before one-off items. *(VIP screen in game; advice: cosx, official server)*
- **Free gems:** in the 3v3 Arena you can like the top 100 commanders up to 3 times a day — 30 gems per like. Following an official community channel once gives 500 gems (Events → Community).
- Buy only in the game or in the official FunPlus top-up centre — see Where to look things up.

Alliance basics

- Every day: **alliance help**, a **tech donation**, and your daily tasks. Help costs you nothing and saves others hours.
- **Pooling boosts:** when R4 puts a marker on one settlement, everybody sends their building or research boost there — one player then finishes a long upgrade in hours instead of days. *(player: Feline, official server)*
- **For R4:** the alliance skills for gathering and infected need no new donation, recharge in 23 hours and last 6 hours — switch them on daily (gathering in the morning, infected in the afternoon). *(member: Drdr, S1L Discord)*

Protection: the peace dome

- The **peace dome** (bought in the alliance shop) is the only real protection. Keep it on and renew it before it runs out.
- **Attacking removes your own dome.** Relocating does not stop a march that is already on its way.
- On duel day 6 and around Arcadia: dome on, troops inside, no gathering without a dome.

3v3 Arena

5 FREE FIGHTS A DAY

Open to everyone with **power plant 16** or higher. You set up **3 teams**; fights are best of three, and the defender's order is random. Your troops take **no damage** here. Winning against a higher rank takes over that rank. **5 free challenges a day**; daily tasks pay for 1, 3 and 5 challenges. Your arena defence also counts as your defender in the **Alliance Siege** — set it up.

SEASON II — AWAKENING OF DRAGONS

✅ FROM PLAYERS ✅ TESTED IN GAME ✅ FROM THE INTERNET
✅ OFFICIAL SOURCE (IN-GAME RULES AND CALENDAR) Season rules read in game (season preview), 28 Sep 2026

Our state is heading into season II. The countdown is in the **season preview** in your settlement (icon on the right). This is what the rules in game say — and what to do before it starts.

YOUR GOAL AND THE ALLIANCE GOAL

- **You:** raise your **dragon resistance**. Dragon monsters strongly reduce the damage your troops deal — higher resistance cancels that. In a raid you also profit from the raid leader's dragon resistance.
- **The alliance:** collect **Dragon DNA**. It comes from taking cities, the state battle and the Gene Clash, and it decides the final rank of the alliance and of the state.
- **The loop:** get season resources (**raw fish** from the fishery, **dragon fruit** from the plantation) → raise dragons and the **Razorback** in your settlement → more dragon resistance → defeat warp dragons → more resources.
- **Cities reset** at the start of the season, and warp dragons occupy them. To take them back you need enough dragon resistance.

BEFORE THE SEASON STARTS

- **SR to SSR:** in season II the SR hero that can be upgraded is expected to be **Sarge**. He must be at 10 stars first — save universal SR fragments and upgrade him on the hero development day. *(players, official server)*
- **Heal and keep troops ready.** Season events are troop-hungry; in the Gene Clash, like in the Oil Clash, lost troops are gone.
- **Keep a stack of speed-ups and resources** for the first days — the season buildings want both.
- **Read the season rules yourself** once it opens: season preview → *Saison-Regeln*. Details we do not know yet are announced in alliance chat.

Season preview with countdown

The season loop

World change: fish, fruit, dragon resistance

Season rewards: Dragon DNA

THE WEEK AT A GLANCE

☑ FROM PLAYERS ☑ TESTED IN GAME ☐ FROM THE INTERNET
☑ OFFICIAL SOURCE (BOTH EVENT SCREENS)

Duel days and all seven phase lists read from in-game screens, 21–28 Sep 2026

Two events score at the same time, and they do not want the same things. The Alliance Duel runs days 1–6 in order. Turbo Turtle runs its phases alongside them — **duel day 1 and turtle phase 1 fall on the same day**, so one column below covers both. This is the one table to check before you spend anything.

THE WEEK AT A GLANCE — DUEL DAY AND TURTLE PHASE SHARE A COLUMN

1	2	3	4	5	6	7
VS ×1 Radar training	VS ×2 Base building	VS ×2 Tech research	VS ×2 Hero development	VS ×2 Battle preparation	VS ×4 Defeat enemies	no duel day
TURTLE gear research troops	TURTLE gear **BUILDING** pets	TURTLE monsters research	TURTLE hero draws manuals	TURTLE gear **PARTS**	TURTLE monsters heroes speed-ups	TURTLE everything

The duel runs days 1–6 in order and the turtle currently seven phases (the rules allow 5–8) — both every week.

Each column is one day: the cyan half is what the duel wants, the green half what the turtle wants. Day 6 is outlined because it carries four of the thirteen duel points.

× scores **Alliance Duel** points ● scores **Turbo Turtle** points

×● both at once — this is where a saved stack is worth the most · scores nothing that day

ACTION / ITEM	1	2	3	4	5	6	7
	×1	×2	×2	×2	×2	×4	–
SPEED-UPS							
Building speed-ups		✕ ●			✕	✕ ●	●

HOW TO READ IT IN TEN SECONDS

Find today's column. Everything with a mark in it scores. Everything else is the same spending on a day where it counts for nothing.

A ✕ and a ● in the same cell is the moment to empty a stack. Building speed-ups in column 2, research speed-ups and behemoth cells in column 3, hero material in column 4 — those are the cells that pay twice.

THE LIMITS OF THIS TABLE

- **Column 7 has no duel day.** The duel ends after day 6; a turtle phase 7 stands alone.
- **The turtle runs every week, just like the duel** — currently seven phases; the rules allow 5–8.
- **Exact point values are not here** — they depend on your level group and are in the VS and Turbo Turtle sections below.

VS — THE ALLIANCE DUEL

☑ FROM PLAYERS ☑ TESTED IN GAME ☑ FROM THE INTERNET ☐ OFFICIAL SOURCE

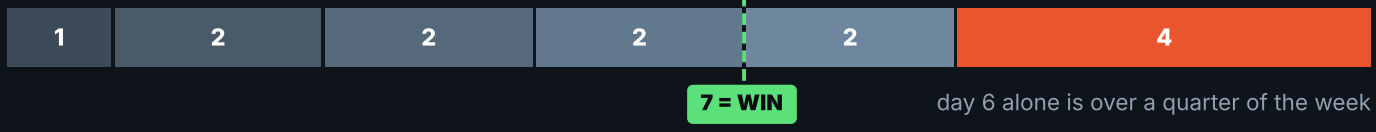

Point values read from in-game screens, 28 Sep 2026

Six days, one theme per day, alliance against alliance. The weights add up to **13**, so **7 wins the week** — day 6 plus two middle days is enough even after a bad start. The order of the days never changes.

THE DUEL WEEK — WHAT EACH DAY WANTS

DAY 1 ×1	DAY 2 ×2	DAY 3 ×2	DAY 4 ×2	DAY 5 ×2	DAY 6 ×4
RADAR	**BUILD**	**RESEARCH**	**HEROES**	**TROOPS**	**COMBAT**
scraps intel stamina	building speed-ups	research speed-ups intel	shards recruits	training intel	kills shields on

13 POINTS IN TOTAL — 7 WINS THE WEEK

day 6 alone is over a quarter of the week

The order never changes. Day 6 carries four of the thirteen points — more than the first three days together.

DO EVERYTHING THE DAY OFFERS

The list below is not a menu to pick from. What each item is worth depends on how often *you* can do it — what is small for one player is the main source for another. **Do everything you can that day. We need every point.**

WHICH WEEKDAY IS WHICH DAY

Which weekday is which duel day: open VS in game — the **Results** tab shows the week, and the alliance board announces it.

DAY	THEME	WEIGHT	EVERYTHING THAT SCORES THAT DAY
1	Radar Training	1	Gear scraps · **Intel Mission** · commander stamina · gathering food, wood, metal, fuel · diamonds from packs
2	Base Building	2	Pet marks and pet food · building speed-ups · S-dispatch · A-delivery · power gained from building · diamonds from packs
3	Tech Research	2	Research speed-ups · **Intel Mission** · behemoth cells · behemoth EXP · biogenic protein · clash medals · power from research · diamonds from packs
4	Hero Development	2	Legendary, epic and rare hero fragments · targeted draft, advanced and standard recruitment · hero skill manuals · diamonds from packs
5	Battle Preparation	2	Training troops, all tiers · **Intel Mission** · building, research and training speed-ups · power from building and research · diamonds from packs
6	Defeat Enemies	4	Killing enemy troops, scaled by tier · S-dispatch · A-delivery · building, research, training and healing speed-ups · diamonds from packs. Your own losses feed the enemy. **Peace shields are mandatory** whenever you are not actively fighting.

The duel cheat sheet as it was made for the alliance. German labels — the day order and weights are the same in every language.

THE SAVING RULE, IN ONE SENTENCE

Whatever you were going to build, research, train or upgrade anyway — **hold it until its day, then finish it**. Same resources, several times the points.

▼ EXACT POINT VALUES PER DAY (BASE VALUES, BEFORE YOUR OWN BONUS)

These are **base** values. In game you normally see **green** numbers — those already include your personal research bonus, so two people doing the same thing correctly see different numbers.

DAY 1 — RADAR TRAINING

Gear scraps used	100 EP → +2,900 · 400 → +11,500 · 2,000 → +57,200 · 10,000 → +285,800 (≈29 per EP)
1 Intel Mission	+37,500
1 commander stamina	+300
100 food / 100 wood / 20 metal / 5 fuel	+1 each

DAY 2 — BASE BUILDING

1 S-dispatch (Dire Dispatch)	+75,000 (once)
1 A-delivery (Doomsday Express)	+50,000 (once)
Speed up building by 1 minute	+250 (scales, unlimited)
+1 power from building	+9
1 legendary pet mark	+30,000
1 epic pet mark	+2,500
1 rare pet mark	+300
Pet food: honey berries · fruit mix · cloud pudding · deluxe meal	+5,000 · +10,000 · +20,000 · +50,000
1 diamond from pack purchases	+20

The real lever here is building itself, not the two one-off dispatches. Speed-ups scale; the dispatches do not.

DAY 3 — TECH RESEARCH

1 Intel Mission	+30,000
1 behemoth cell used	+12,000
100 behemoth EXP in one attempt	+1,000
1 clash medal spent	+2,500
Research timer −1 minute	+250
+1 power from research	+4
1 biogenic protein (not the exclusive kind)	+10,000

DAY 4 — HERO DEVELOPMENT

1 legendary hero fragment	+15,200
1 targeted draft	+13,400
1 advanced recruitment	+3,000
1 hero skill manual	+2,500
1 epic hero fragment	+1,600
1 standard recruitment	+500
1 rare hero fragment	+160

DAY 5 — BATTLE PREPARATION

1 Intel Mission	+37,500
Train 1 troop, by tier	T1 +6 · T2 +11 · T3 +17 · T4 +22 · T5 +26 · T6 +33 · T7 +37 · T8 +44 · T9 +52 · **T10 +60**
Building / research / training −1 min	+250 each

DAY 6 — DEFEAT ENEMIES

1 A-delivery (Doomsday Express)	+50,000
1 S-dispatch (Dire Dispatch)	+75,000
Building / research / training / healing −1 min	+250 each
Enemy troop killed in an assigned alliance battle	T1 +6 · T2 +12 · T3 +18 · T4 +24 · T5 +30 · T6 +36 · T7 +42 · T8 +48 · T9 +54 · **T10 +60**
Enemy troop killed in a random alliance battle	T1 +1 · T2 +2 · T3 +4 · T4 +5 · T5 +6 · T6 +7 · T7 +8 · T8 +10 · T9 +11 · **T10 +12**
Allied troop losses (PvP)	T1 +1 … T10 +10
1 diamond from pack purchases	+20

Kills in an **assigned** alliance battle are worth five times more than in a random one. Shield discipline still decides this day.

▼ MILESTONE CHESTS — THRESHOLDS AND EXACTLY WHAT IS INSIDE

Daily tasks feed two things at once: **alliance points** for the day's race, and your **personal milestone chests**. The chests run from 50,000 to 5 million points. The number on a chest is its item value; what matters is what is actually in it.

THE PATTERN WORTH KNOWING

Every third chest is the good one. The chests at **500k, 1.5M, 3M and 5M** hold hero fragments, skill manuals, behemoth cells and gear scraps. The ones in between are gems and resources. If you are deciding whether one more push is worth it, look at which chest is next.

POINTS	VALUE	WHAT IS INSIDE
50k	25,500	100 gems · 50 clash medals · 20 wood · 20 food · 1 fuel · 4 metal (resource units of 10,000)
150k	25,600	200 gems · 50 clash medals · 20 wood · 20 food · 1 fuel · 4 metal
500k	55,692	**1 behemoth cell · 10 hero skill manuals · 100 clash medals · 10× 10,000 hero EXP · 5 gear scraps · 3 elite hero fragments · 5 building speed-ups**
650k	27,300	300 gems · 50 clash medals · 100 wood · 100 food · 5 fuel · 20 metal
900k	27,400	400 gems · 50 clash medals · 100 wood · 100 food · 5 fuel · 20 metal
1.5M	58,233	**20 hero skill manuals · 2 behemoth cells · 2 epic hero fragments · 100 clash medals · 5 gear scraps · 10× 10,000 hero EXP · 5 research speed-ups**
2M	104,500	500 gems · 200 clash medals · 200 wood · 200 food · 10 fuel · 40 metal
3M	110,925	**1 legendary hero fragment · 3 behemoth cells · 30 hero skill manuals · 200 clash medals · 5 gear scraps · 20× 10,000 hero EXP · 5 training speed-ups**
5M	210,925	**1 legendary hero fragment · 3 behemoth cells · 30 hero skill manuals · 400 clash medals · 5 gear scraps · 20× 10,000 hero EXP · 5 universal speed-ups**

THE THREE THRESHOLD BARS AS THEY APPEAR IN GAME

50k · 150k · 500k

650k · 900k · 1.5M

2M · 3M · 5M

EVERY CHEST, OPENED

50k — gems and resources

150k — gems and resources

500k — elite hero fragments, manuals, scraps

650k — gems and resources

900k — gems and resources

1.5M — epic fragments, 20 manuals

2M — gems and resources

3M — legendary fragment, 30 manuals

5M — legendary fragment, 400 medals

The research branches that raise your duel point bonus. This is why two players doing the same thing see different numbers.

TURBO TURTLE — THE 7 PHASES

☑ FROM PLAYERS ☑ TESTED IN GAME ☐ FROM THE INTERNET
☑ OFFICIAL SOURCE (IN-GAME RULES SCREEN)

All seven phase lists read action by action from the in-game phase screens, 21–27 Sep 2026

Turbo Turtle turns **gear upgrades** into event points. Every upgrade pays twice — your stats go up and you score. **Blue scraps are worth roughly four times green ones.**

Each phase scores a different list of actions. Not just a different topic — a different list. Phase 1 and phase 5 both want hero gear, but phase 5 also wants common parts and precision blueprints while phase 1 wants troop training instead. **Improving** gear (verbessern) and **strengthening** it (verstärken) are counted as two separate actions. Read the matrix, not the headline.

The turtle currently runs **phase 1 on Monday through phase 7 on Sunday**, the same as the duel days. The in-game rules allow **5–8 phases of 1–2 days each**, so check the phase counter in the event (for example "Phase 3/7"). The list inside a phase stays the same, and the exact point values appear in game on the day itself.

TURBO TURTLE — EVERY PHASE SCORES A DIFFERENT LIST

1	2	3	4	5	6	7
gear research troops	gear **BUILDING**	monsters research	hero draws manuals	gear **PARTS**	monsters heroes speed-ups	everything

HERO GEAR SCORES IN FOUR PHASES — 1, 2, 5 AND 7. But not the same actions each time — see the matrix.

Phase 7 scores everything — the day to empty whatever is left. Diamond packs score in all seven.

Colour marks the theme of a phase. The theme is only a headline — the exact actions differ, which is what the matrix below shows.

THE FULL PHASE LIST IS IN THE WEEK TABLE

Every action of all seven phases — next to what the duel wants on the same day — is in **The week at a glance**. It is kept in one place so the two never drift apart.

THE 10M MILESTONE AND PRESTIGE WEAPONS

There is now a milestone at **10 million points** — confirmed on the event screen, where the ladder reads 10k / 1.0M / 2.0M / 3.5M / 5.0M / 10.0M. It gives a **fragment**. The chain from there: **5 fragments → 10 coins**, and **20 coins → one new prestige weapon** for a hero. Upgrading that weapon costs the same coins, so the coins stay useful long after the first weapon.

"STAGE" MEANS TWO DIFFERENT THINGS — KEEP THEM APART

Rank tiers (5): Bronze → Silver → Gold → Diamond → Legend. These decide how *rich* your milestone rewards are.

Phases (1–7): these decide *which actions* score today.

▼ HOW PROMOTION, MEDALS AND MILESTONES WORK

Promotion is by placement in your small group, not by a fixed score. At the end of each phase the best of the group move up: Bronze top 4, Silver / Gold / Diamond top 3. Everyone else holds or drops. Watch your group standing, not only your total.

Three leaderboards run at once: your group (4–5 players, decides promotion), your rank tier, and the overall event ranking which adds up all phases.

Race medals come from the levels you reach. In the shop: 20 medals buy one top gear item once; single medals buy a 1-hour speed-up or a supply box ×10.

MILESTONE LADDER

10,000 / 1.0M / 2.0M / 3.5M / 5.0M / **10M** points. Contents get richer with your rank tier (Bronze → Legend); the 10M step is the prestige fragment described above.

REWARD	BRONZE	SILVER	GOLD	DIAMOND	LEGEND
Gems	500	1,000	1,500	2,000	2,000
Hero EXP (10K)	100	140	150	200	200
Hero manual	40	60	70	80	100
Behemoth cell	2	3	4	4	5

The turtle emote unlocks from **Gold** upward. The event shop gives roughly one alloy box per week plus signature tokens and gear material.

POWER PLAY — THE 4-HOUR ROUNDS

✅ FROM PLAYERS ✅ TESTED IN GAME ✅ FROM THE INTERNET
✅ OFFICIAL SOURCE (IN-GAME RULES AND CALENDAR) Rounds and calendar read directly from the game

A solo ranking event with rotating themes. **Each round lasts 4 hours.** Every day at 00:00 UTC twelve players with similar power-plant levels are drawn into a group, and you are ranked inside that group for the day.

KEEP THIS IN PROPORTION

Power Play is a **bonus you take along when it happens to line up** with what you were doing for VS or Turbo Turtle anyway. It is not a third event to plan around, and it is not worth spending resources for on its own.

THERE IS NO SCHEDULE THAT FITS EVERYONE — OPEN YOUR OWN CALENDAR

You are grouped by **power plant level** (seen in game: "Group: Level 26–Lv.27"), and which theme lands in which slot is not the same for everyone any more. There is no alliance-wide timetable worth posting.

Where to look: open Power Play and press the **Calendar** button at the left of the banner. It lists *Date* · *Activation time* · *Theme* for the coming days and highlights the round running right now — six slots a day, four hours apart. That table is yours; read it there, not here.

Example of one player's calendar — yours can differ. Times are shown in your device's local time.

A running round: theme, level group, chests and points per action

THE SIX ROTATING ROUNDS

Hero Upgrade · Settlement Construction · Chief Collection · Tech Research · Gear Enhancement (gear scraps) · Behemoth Growth

DO NOT CONFUSE IT WITH TURBO TURTLE

Power Play runs in **4-hour rounds**. Turbo Turtle runs in **day-long phases**. They are different events and they often reward the same action — which is exactly what makes a Golden Window.

▼ SCORING DETAIL, MILESTONE CHESTS AND RANK REWARDS

Point values depend on your level group — do not take another player's numbers as yours. The figures below come from three different groups, to show how far apart they can be.

GEAR ENHANCEMENT ROUND — GROUP LEVEL 26–27, READ 15 SEP 2026

Use 1 gear scrap worth 100 EP	714
Use 1 gear scrap worth 400 EP	2,857
Use 1 gear scrap worth 2,000 EP	14,286
Use 1 gear scrap worth 10,000 EP	71,429
1 diamond from pack purchases	60

Milestone chests in that round: 30,000 · 90,000 · 200,000. The daily goal bar sat at steps 2 / 8 / 18.

TECH RESEARCH ROUND — GROUP LEVEL 28–29, READ 28 SEP 2026

+1 power through research	3
Research speed-up, per minute	42
1 diamond from pack purchases	60

Milestone chests there: 30,000 → 3,290 💎 · 90,000 → 5,690 💎 · 200,000 → 10,030 💎.

EXAMPLE: BEHEMOTH GROWTH ROUND

Behemoth cell	2,800
Per 100 behemoth EXP	200

Milestone chests there: 30,000 → 3,290 💎 · 90,000 → 5,690 💎 · 200,000 → 10,030 💎.

DAILY RANK REWARDS INSIDE YOUR GROUP

1st	Power Play medal ×1 · troop manual ×5 · 10K EXP ×5 · troop speed-up box ×5
2nd	troop manual ×3 · 10K EXP ×3 · troop box ×3 — no medal
3rd–5th	same items, decreasing amounts

Where to find it: world map → **Events** (top right) → drag the tab bar right to **Power Play** → the "?" button shows the rules, the internal **Calendar** button shows the round rotation.

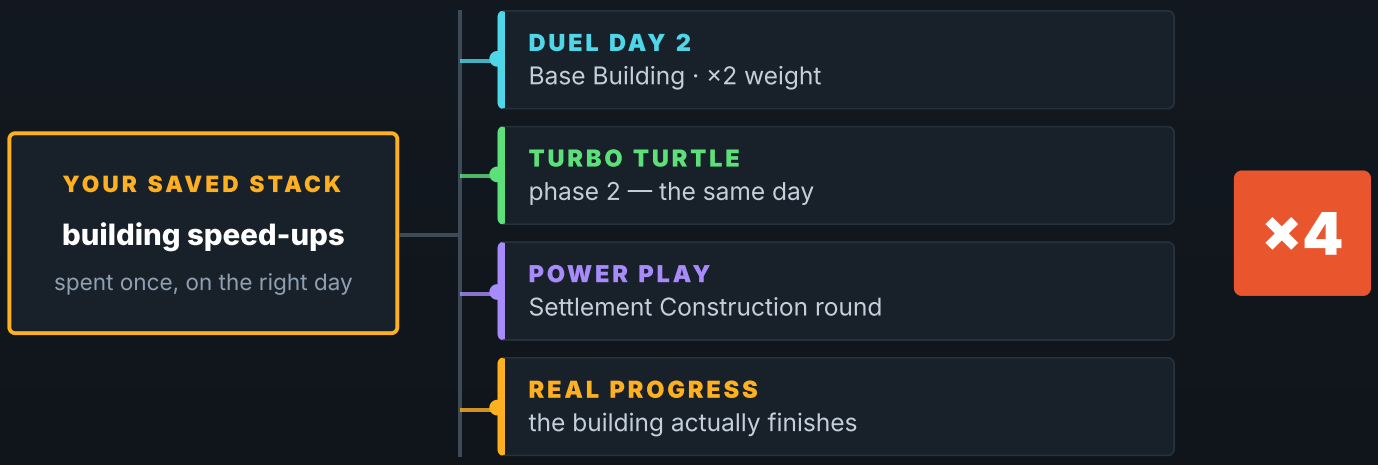

THE GOLDEN WINDOW

☑ FROM PLAYERS ☐ TESTED IN GAME ☑ FROM THE INTERNET ☐ OFFICIAL SOURCE

Reasoning from our own notes — not verified end to end

A Golden Window is a moment when one action pays into **four** things at once: the Alliance Duel day, the Turbo Turtle phase, the matching Power Play round, and your actual progress. The turtle is the one most people forget — and on the right day it is often the biggest of the four, because turtle points come in automatically for something you were going to do anyway.

THE GOLDEN WINDOW — ONE ACTION, FOUR PAYOUTS

Same resources. Four times the return. This is why hoarding is the strategy, not stinginess.

The turtle only pays if the running phase scores that item. For building speed-ups that is phase 2 — the same day as duel day 2 — and again phases 6 and 7.

Building speed-ups are the clearest case, but the same shape applies to scraps on day 1, research on day 3 and hero material on day 4. Check the phase matrix first — the turtle only joins in if the running phase scores that item.

THE CLEAREST EXAMPLE

Building speed-ups, finished on **duel day 2 (Base Building)**, inside a **Settlement Construction** Power Play round, while Turbo Turtle runs **phase 2, 6 or 7**. One stack, four payouts.

Those three turtle phases are the only ones that score building speed-ups. If the phase is 1, 3, 4 or 5, the same stack pays three times instead of four — still worth it, just not the peak.

The same logic applies to gear scraps on day 1, research on day 3 and hero material on day 4. Two more overlaps worth knowing:

- **Cave Conquest also awards Alliance Duel points** — so playing it on a duel day counts twice.
- **Stamina on duel day 1** feeds the Radar day and, when Sawblade Waltz is running, produces sawblades at the same time.

Which windows are open this week is announced on the alliance board in game. This page deliberately carries no dates.

ALLIANCE AND BATTLE EVENTS

✅ FROM PLAYERS ✅ TESTED IN GAME ✅ FROM THE INTERNET ✅ OFFICIAL SOURCE (PARTLY)

Mixed — see each event

Navigation: the wilderness screen

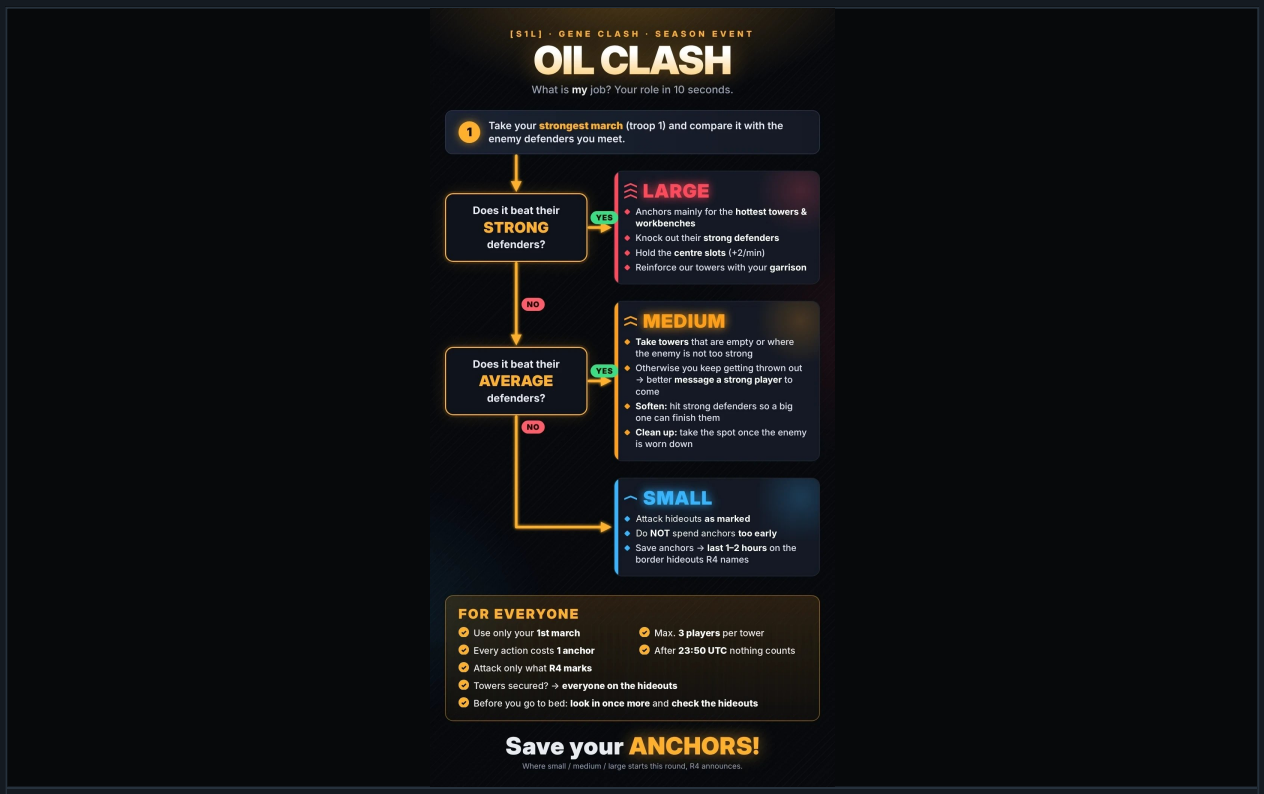

The alliance and battle events below happen in the wilderness. Numbers 1–22 are explained under the settlement screen; here only what is new.

Wilderness screen (in game, 1 Oct 2026)

- **23** Magnifier — search: infected, fanatics, food, wood, metal, fuel. Pick the level, then Search.
- **24** Star — bookmarks: all, alliance, personal markers.
- **25** Coordinates — jump to a state and X / Y.
- **26** Marches — your marches with time left; the blue arrow calls a march back.

Oil Clash / Gene Clash SEASON EVENT

Your role at a glance — tap to enlarge.

What wins it: whoever holds the most deep-sea crude at the end. Everything resets at **00:00 UTC** — yesterday's ownership protects nothing.

The Gene Clash in Season II runs on the same rules. Only the names change: the towers are called **workbenches** there, the hideouts keep their name, and the prize is Dragon DNA instead of crude. Top rewards include rare prestige gear for heroes.

WHAT EVERY MEMBER SHOULD UNDERSTAND

- We lose when we do not have enough anchors to attack together. Strength alone is not enough.
- **Half is enough** — putting more anchors into a spot past its threshold is wasted.
- Small players attack hideouts only as marked and do not spend their anchors too early. Most of your attacks wait for the final push.
- **Softening a target counts as much as taking it.** Medium marches damage a spot so that a big account can walk in afterwards with a single anchor. That saves exactly what we have least of.
- There is no worthless attack. Even damage that does not kill a hideout still builds the alliance buff.

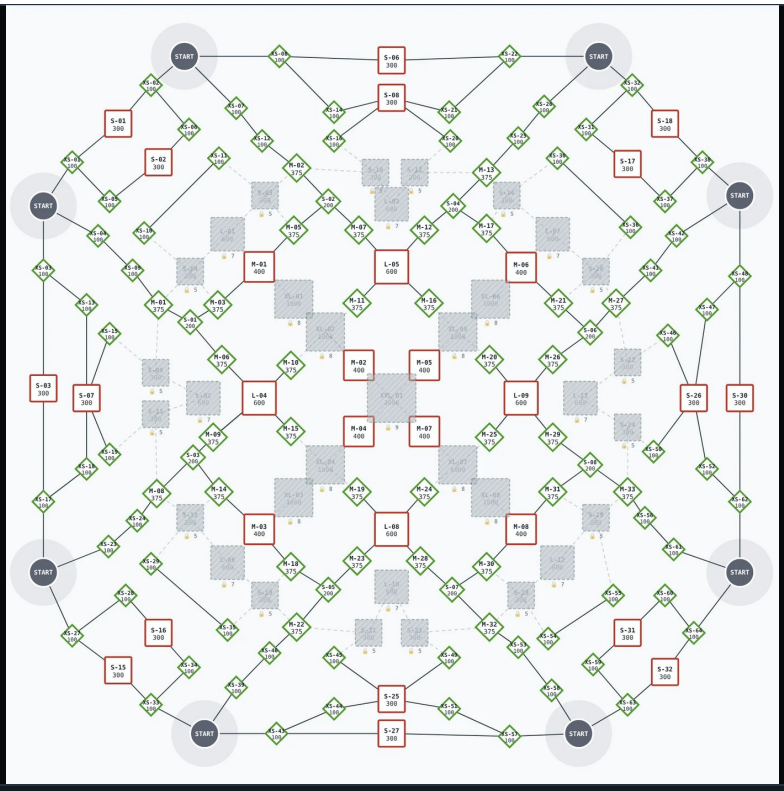

THREE THINGS DECIDE THE ROUND

1. **Save your anchors** for the moments that matter.
2. **Play the role that fits your march** — small, medium or large (below).
3. **The last one to two hours** before the round closes decide the day.

YOUR ROLE DEPENDS ON YOUR MARCH

Measure your strongest march (troop 1) against the enemy defenders you actually meet — not against a fixed number. What counts as small, medium or large changes with every round and every opponent, so R4 announces the current limits. Keep only **one march** on the map at a time, so everyone in the alliance has room to score.

- **Small — you lose against most of their defenders.** Attack hideouts as marked. Do not spend your anchors too early. Keep the rest and spend them in the last one to two hours on the border hideouts R4 names — the enemy then has almost no time to answer.
- **Medium — you beat their average defenders, not their best.** Take towers that are empty or where the enemy is not too strong — towers bring different amounts of oil. Otherwise you just keep getting thrown out: better message a strong player to come. Prepare: weaken strong defenders so our biggest can finish them. Clean up: take a spot once the enemy there is worn down.
- **Large — you beat their strong defenders.** Keep your anchors for the high-priority towers and workbenches that are fought over hardest. Knock out their strong defenders, hold the key centre slots (+2 per minute) and reinforce our towers with your garrison — at most **3 players per tower**.

The map at the start of a round, without alliances. Grey circles = the eight start points, which can never be attacked. Red squares = workbenches (towers), green diamonds = hideouts; the number = daily yield in Dragon DNA. Grey = still locked, the lock shows the day of the clash it opens on (as in our round). You can only attack along a line from your own territory.

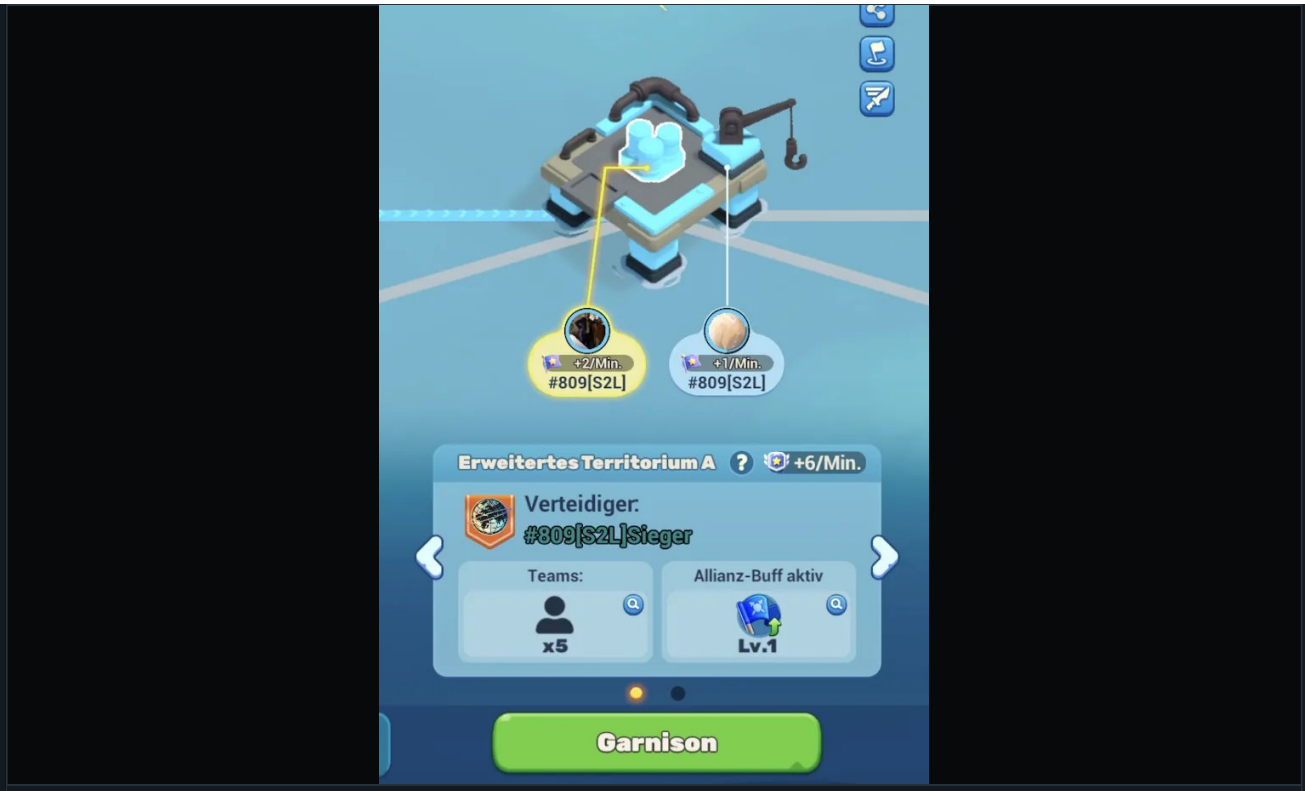

When the locked areas open (our round; everything opens at 00:00 UTC)

DAY OF THE CLASH	AFTER	WHAT OPENS
Day 1	start	All hideouts, the 16 outer S workbenches, all 8 M workbenches and the 4 L workbenches on the centre cross
Day 5	4 days	The 16 inner S workbenches
Day 7	6 days	The other 8 L workbenches
Day 8	7 days	The 8 XL workbenches around the centre
Day 9	8 days	The XXL workbench in the centre

▼ POINTS, THRESHOLDS, ANCHORS AND THE NIGHT TRICK

How points are produced. A tower has several slots — one centre plus one or more cranes. A hideout is a single spot.

SLOT	OUTPUT
Centre	+2 points / minute
Crane	+1 point / minute

A territory header shows the sum, the slots below show +2 and +1 each with the holder's alliance tag.

THE THRESHOLD FORMULA

Daily threshold = points per minute × 720. Once we pass it, the points for that day are secured — the enemy can no longer catch up, and from then on **no more anchors go there**. Whoever is already in may stay; if you are needed at a contested tower, move there — the secured points stay. If the enemy passes it first, attacking there is pointless.

TOWER	PTS/MIN	DAY MAX	THRESHOLD
S tower	3	4,320	**2,160**
M/L tower	4	5,760	**2,880**
L/XL tower	6	8,640	**4,320**

The in-game hint on an S tower says exactly this: hold to 2,160+.

TWO HARD LIMITS

Connection rule: you can only attack what borders our own territory — the alliance has to advance as a connected chain. **Occupied rule:** you cannot slide into an occupied spot, you have to take it. That is why free slots are so valuable.

Staggered unlocking: towers carry countdown locks. Early on most of the map is closed; at the end everything opens at once and everyone fights simultaneously. **That is the real reason for anchor discipline.**

ANCHOR ECONOMY

Every action costs one anchor — moving into a tower costs one, just like attacking a hideout. Every daily reset gives you **8 free anchors**, **10 with the season weekly pass**; one-time packs can add up to 7 more. You can hold at most **15 active anchors** at once.

Banking anchors. Daily anchors wait in reserve until you claim them. When you get close to 15, stop claiming. Spend down to 7 or fewer and claim the reserve before the round closes at 23:50 UTC. After the reset the new day's anchors wait on top — that is how you go into a key battle day with **23–25 anchors**.

Day 1: hold your anchors until R4 has set the map plan. The first hideout in front of our start point falls to a single attack.

THE NIGHT TRICK

After the 00:00 UTC reset everything is free and most opponents are asleep. Dropping into three territories then pays off — but only if you are online at the reset and the enemy there is not active, or your marches are strong enough to hold the spots. The same goes during the day when something is free. **As a general rule: use only your first march.**

HIDEOUTS: WHAT THEY NEED AND WHAT THEY PAY

Each hideout shows a faction weakness. Match your heroes to it (Valor, Rogue or Flight) for bonus damage — more damage means fewer anchors. Minimum march power and base points per attack as given in the official strategy guide:

HIDEOUT	MIN. MARCH POWER	BASE POINTS PER ATTACK
XS hideout	6.64 M	4,400
S hideout	12.36 M	7,400
M hideout	17.86 M	13,400

A DAY IN THE CLASH (UTC)

- **Before 00:00:** read R4's orders in the alliance chat or on Discord. When you ask for a task, always give your strongest march and how many anchors you have.
- **At 00:00 (reset):** garrison the key open towers — they score all night. Do not attack hideouts yet.
- **Hours 1–6:** the opening fights. Hold your assigned tower or weaken enemy targets for your teammates.
- **Hours 6–10:** night watch. Guard the +2 centre slots while others are offline and push back late raids.
- **Hours 10–22:** midday check. Which towers have passed their threshold? Troops that are not needed there move to the contested ones.
- **Last 1–2 hours:** the final push. The round closes at **23:50 UTC**, ten minutes before the reset. Everyone spends their saved anchors where R4 says — the small accounts on the border hideouts R4 has named. As soon as our towers have enough points and are secured, **everyone** goes for the hideouts.
- **Before you go to bed:** look in once more and check the hideouts.

MISTAKES THAT COST THE ALLIANCE

- **No more than three players per tower.**
- **Attack only what R4 marks.**
- **Lost a spot? Take it back in two steps.** One or two smaller attacks wear the defenders down, then a medium march retakes it.

HIDEOUTS AND THE ALLIANCE BUFF

The in-game text says it plainly: improving alliance buffs by attacking hideouts, and **those buffs also apply in PvP**. Progress runs on total alliance damage to the hideout.

BUFF	LV.1	LV.2
Hero attack in combat	+1,500	+3,000
Hero defence in combat	+300	+600
Hero HP in combat	+150,000	+300,000

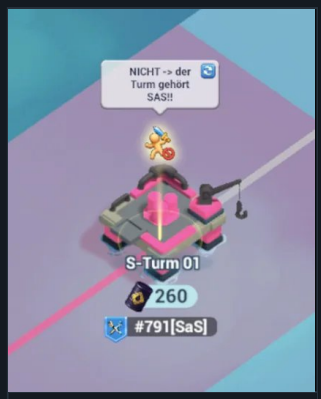

Buff progress is fed by alliance damage — which is why every attack matters.

MAP MARKERS — WHAT THEY MEAN FOR YOU

R4 marks on the map what we attack. **Attack only what R4 marks.** If a marker says *"do not attack"* — because it is already ours or belongs to another alliance — **hands off.** If in doubt, ask before attacking — a wrong attack costs an anchor and can break a deal.

Marker: already secured

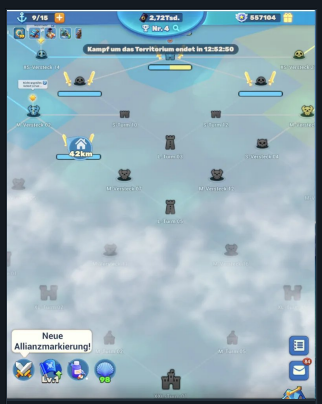

Marker: another alliance

"Not connected" — cannot attack

Locked towers with countdown

The map

XS hideout

TWO REWARD TRACKS — BOTH PAY, BOTH WORTH TAKING

Alliance (crude): chests at 2.0 / 5.0 / 10.0 / 15.0 / 20.0 / 30.0k. **Personal (merits):** chests at 5.0 / 20.0 / 100.0 / 150.0 / 200.0 / 300.0k. Personal rewards do not depend on winning — always clear them.

RANK REWARDS AT THE END OF THE ROUND

PLACE	GOLD	ALLIANCE SILVER (500)	ITEM	1H SPEED-UP	1H HEALING
1	30,000	40	15	30	30
2	16,000	30	12	25	25
3	14,000	28	11	23	23

The middle item in the third column has not been identified yet — the icon is too small to name it with certainty.

Reservoir Raid

30 V 30, CROSS-STATE

What wins it: the alliance with the most alliance water when the timer ends. **Only water decides the win.** Water at a building is **not safe yet** — as long as it shows above the building, the enemy can steal it. Water from **puddles** and **water tanks** is safe and cannot be stolen. Kills give points for the personal ranking, not for the win.

ALLIANCE RULE — THIS PART IS BINDING

[S1L] plays in **five teams**: four colour zones — **yellow** (top left), **orange** (top right), **red** (bottom left), **blue** (bottom right) — plus the **centre team**, who move freely. In phase 2 we join two teams into one. Which teams join is announced before the raid. **Every team has a leader.**

Before every raid:

- **Read the rules on this page first.** Every player, every raid. Is your language missing? Just ask — we will add it.
- **Send a thumbs up in your assigned group in good time before the raid** — it shows that nothing came up and you will be there. So the leaders can still assign a substitute **before** the raid starts and it gets stressful.

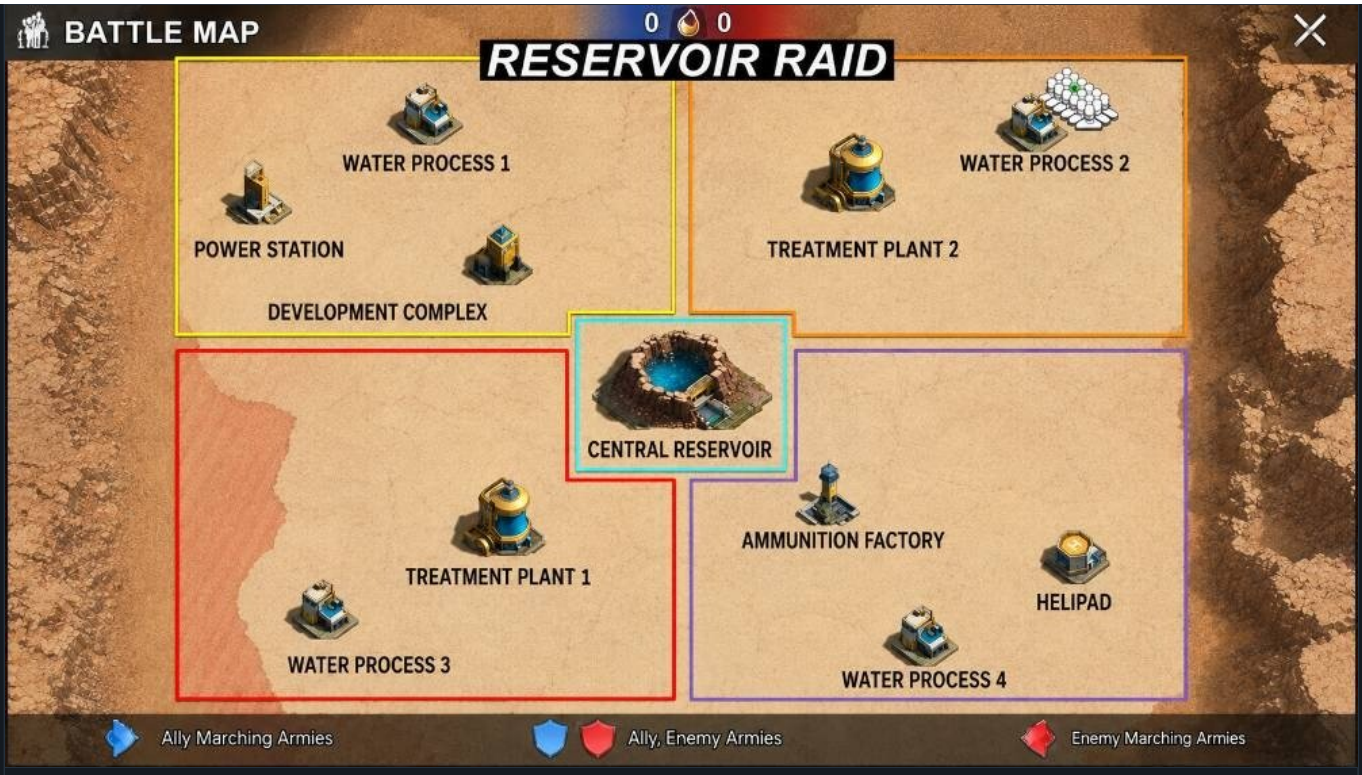

During the raid:

- All team leaders are together in **voice chat**. They decide the plan and post it in the team chats and in the reservoir chat.
- **In the reservoir chat only team leaders write** (or players they name) — the most important information for everyone. Everyone else writes there only in an emergency.
- **Your team leader is your contact.** Need something or under attack? Say it in your team chat. Your leader is in voice chat with the other leaders.

What a team leader is responsible for:

- **Coordinating with the other team leaders** — on Discord, or in chat when speaking is not possible for language reasons.
- **Opening the group** and checking that everyone who should be there is there.
- **Asking whether everyone knows what to do** — and assigning people if that is needed.

Stay in your assigned zone. **Substitutes do not join on their own** — they wait for the leaders' instruction in case someone drops out or has to be swapped.

The four colour zones; the centre team moves freely. Who is in which team changes per event and is announced before each raid — it is not listed here on purpose.

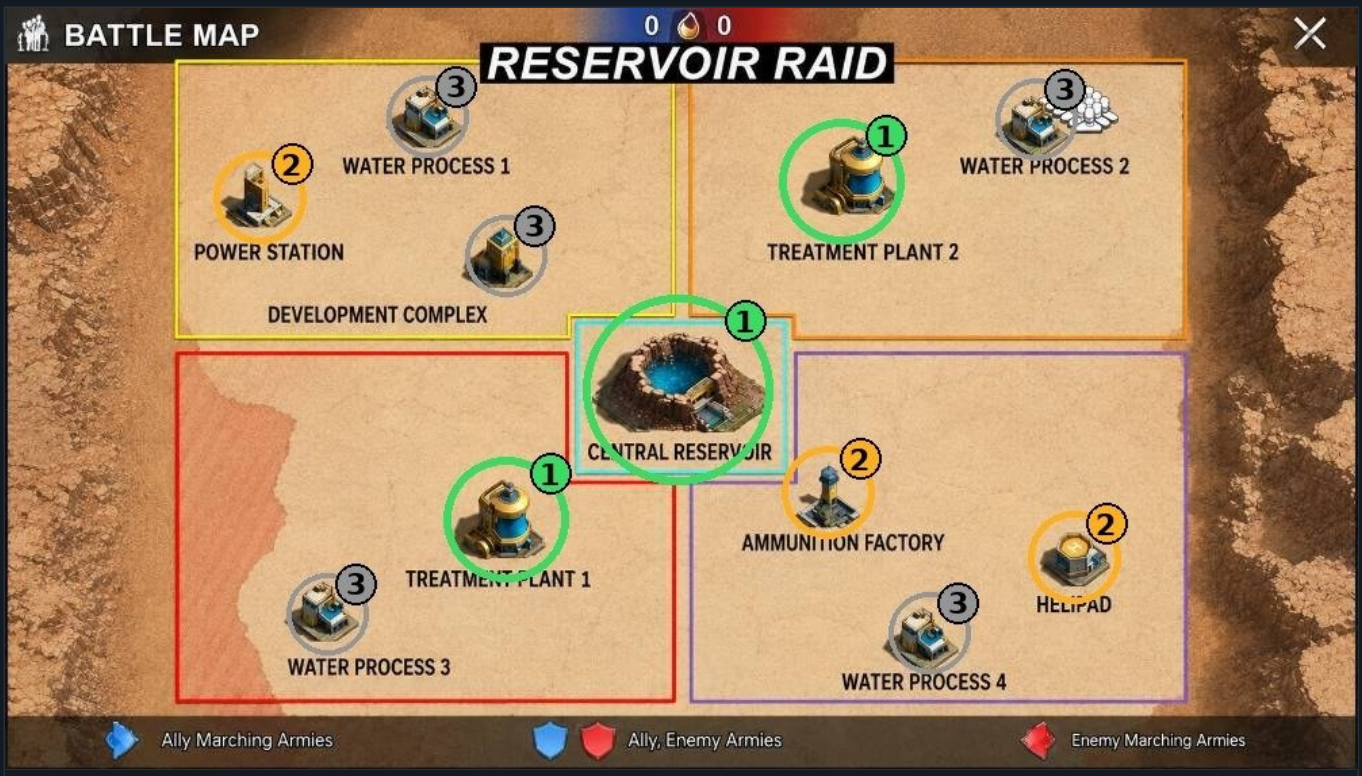

HOW WATER WORKS — AND HOW WE STEAL IT

- **First capture bonus:** the first alliance to take a building gets a one-time bonus. It is safe and cannot be stolen.
- A building only starts to collect water after it has been **held for 2.5 minutes**.
- **Stealing:** attack and take a building. The water it collected then drops around it as **puddles**. Whoever collects the puddles keeps the water.
- **Jump to the puddles at once** if you have a free teleport — before the enemy gets them.
- **Only selected players from the strong group attack the buildings.** Shortly before, the leaders post the coordinates and the time left until the capture.
- **At the end of the raid** the water still above a building counts for the alliance that holds it.

OUR THREE GAME PLANS — THE LEADERS CALL THE PLAN

The leaders decide in voice chat and post **PLAN 1**, **PLAN 2** or **PLAN 3**. The plan can change during the raid. **Water tanks are collected in every plan.**

1. **PLAN 1 — we are much stronger:** we stay in five teams and hold everything.
2. **PLAN 2 — similar strength, or the enemy fights back:** we take only the important buildings (map below) and collect and protect our water there. Near the end, on the leaders' call, we attack the other buildings and steal their water.
3. **PLAN 3 — the enemy is stronger:** we leave the buildings, hold only the centre and collect water tanks. Then one of two ways: **if we are strong enough**, we let the enemy fill the buildings and steal the water from the important ones near the end. **If we are too weak for that**, we attack again and again so that the enemy never holds a building for 2.5 minutes — then it collects nothing. Which way, and the details, the leaders post in the reservoir chat during the raid.

Which buildings matter most. **1** = important, hold it · **2** = medium, hold it if we can — bonus for damage, for faster jumping or for faster capturing · **3** = less important, steal its water instead of holding it. The leaders can change this during the raid.

THE TASKS IN EACH ZONE

Who does which task is decided by the team leader.

1. **Take our buildings** in the zone.
2. **Collect the water tanks** in our quarter.
3. **When a building is captured, the water it collected spreads around it** — you can see the water on the map around that building. Someone always has to jump there and pick it up.
4. **When the central building shows water on the map** and we have already collected well, everyone except the one person securing the main buildings jumps to the middle and collects the puddles.

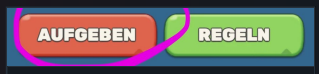

OUT OF TROOPS? GIVE UP AND COME BACK FULL

If you have no troops left in the raid, **give up on purpose**. After 10 minutes you can go back in — then **all your troops are full again**.

1. Tap the water drop with the timer at the top of the screen.
2. In the battle details, tap the red button on the left (German client: “AUFGEBEN”).
3. Wait 10 minutes, then join the raid again.

Tap the water drop with the timer

Red button on the left: give up

TWO TIPS: KEEP YOUR TROOPS, SEE EVERYTHING

- **Take your troops off the wall before you enter the raid.** Tap your wall and remove the blue check mark at **Garrison** for every squad. Then you lose no troops when you are attacked in the raid. Only the troops that march with your heroes in your own attacks get wounded. The red warning in this window does not apply in the reservoir raid.
- **Use the magnifier on the small map** (top right). Tap it to see the state of every building and all water tanks.

Tap your wall

Remove the blue check mark at Garrison for every squad

▼ BUILDING VALUES, RULES AND WHAT TO PREPARE

BUILDING	ALLIANCE WATER / MIN	COUNT
Central Reservoir	1,800	1
Treatment Plant (large)	1,200	2
Water Process (small)	600	4
Ammunition Factory / Power Station / Development Complex / Helipad	240 each	–

Bonus buildings: Ammunition Factory gives +20% attack and defence to everyone · Development Complex sends infected waves that weaken the enemy troops in their buildings · Helipad: your free teleport comes back twice as fast (−50% cooldown) · Power Station: you capture buildings in half the time (−50% occupation timer).

Note: this picture comes from another game (State of Survival). The numbers are not exactly ours, but very close. The effects work the same way in principle — only the numbers may be a little different.

Building details from another game with the same map. Names there: Water Treatment Center = Treatment Plant · Water Processing Plant = Water Process · Munition Factory = Ammunition Factory · Solar Power Station = Power Station · Dev Compound = Development Complex.

Water tanks appear when the timer shows 36 minutes, and twice more at 26 and 16 minutes. While you hold a tank, it gives 240 water per minute.

Rules that catch people out: troops you lose in the raid are only lost inside the raid — **when you leave, your troops are back as before**. So attack boldly. If you leave, you can only come back after 10 minutes, then again with all your troops. Before the start bring all marches home and do not reinforce outposts. **Free teleports** come every few minutes — check the exact time in the game, and save them for the puddles and the endgame.

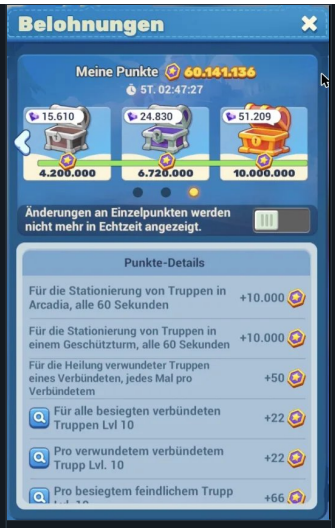

Arcadian Conquest

2-HOUR SIEGE

What wins it: the alliance that holds Arcadia for **one hour without interruption** during the two-hour fight — or, if nobody manages that, the one with the **longest total occupation** at the end. Its leader automatically becomes governor. Holding the **towers** makes the attacks on Arcadia come more often. **Scoring: 10,000 points for every 60 seconds** you station troops in Arcadia or in a tower. It runs every week, server against server: one server guards Arcadia, another invades.

The event screen: the guarding server against the invading server

Personal points and chests — 10,000 per minute in Arcadia or a tower

How we play it — these six rules apply to everyone in the alliance.

1. **Read first.** R4 sends out the information before the event. Read it and act on it.
2. **Peace dome.** Your peace dome is gone in Arcadia. Renew it as soon as you are back home.
3. **Front row.** The front row belongs to the strong players, because they need short routes. Smaller players can hold places there and then swap with strong players.
4. **Rallies.** Only selected players start rallies, and only strong players join. If in doubt, ask first.
5. **Other players' bases.** Leave them alone. Attack only when the order is given explicitly.
6. **If you are attacked.** Do not strike back. Send the report to the alliance chat, and we sort out what happens.

▼ THE RELOCATION WINDOW AND THE REALISTIC GOAL

Relocation window — this one is critical. One hour before the start, settlements in the danger zone around Arcadia are moved to a random spot. From 50 minutes before the start until the end you can move into the danger zone freely, **but peace shields in the zone are removed and cannot be switched on again**. A settlement defeated inside the zone is moved to a random spot at once.

Realistic goal: one hour of uninterrupted hold on Arcadia, or the longest total hold — not surviving two hours against nobody.

Alliance Siege

5 DAYS · ARENA LINE-UPS

Not the same as Arcadian Conquest. Open only to alliances in the **top 36 of the state** with at least **30 commanders who have set an arena defence line-up**. Each week six alliances form a group, and every day your alliance faces another one from that group. Both sides take turns attacking the other side's defending commanders — each successful attack earns a victory point.

WHAT EVERY MEMBER SHOULD DO

- **Set your arena defence line-up.** Your defender is your arena defence from the day before, or your strongest team in the 3-v-3 arena. Without it you do not count towards the 30.
- **Use your attack every day.** Each attacker earns at most one victory point per day, and each defender can be beaten only once — so every member's single hit counts.
- Stronger defenders give more victory points. One special reinforcement defender can be attacked without limit but gives only a few points.

At **23:55 UTC** the alliance with more victory points wins that day's bonus rewards and group points. After five days of fighting, the group ranking decides the weekly rewards and whether the alliance moves up a tier. Daily rewards are claimed on the event screen; group rewards come by mail. New members can only take part from the next Alliance Siege.

A day match: our alliance against another alliance from the group

Ghoulion Pursuit

30 MINUTES

An alliance boss rally where **your personal damage** decides your reward bracket. The hunt lasts **30 minutes**. Everyone who can lead a rally leads their own instead of waiting — maximum hits per minute is the whole game here.

The event screen — an R4 or higher reserves the start

BEFORE IT STARTS

- Switch to single-target and boss-damage heroes, signature weapons and damage gear. Take the tank gear off.
- Hold your damage buffs and attack consumables for these 30 minutes only.
- Donate **before** the event — donations strengthen the hunting field and give battle bonuses. The level resets when the event ends, and donations beyond the maximum level do not carry over.
- Only **R4 or higher** can start or schedule the hunt. Raids on the hunting field cost **no stamina**. Anyone who joined the alliance less than 48 hours ago cannot take part.

▼ REWARD BRACKETS

Rewards are paid out at the end by **damage**: your own damage sets your personal bracket, and the alliance's total damage unlocks extra rewards for every member. The brackets and items grow with the Ghoulion level — read them in game under **Rewards**.

Personal rewards by your own damage

Alliance rewards and the MVP damage bonus

The top player's damage multiplies the alliance reward: ×1 up to 99.99M, ×2 to 159.99M, ×3 to 239.99M, ×4 from 240M. So pushing the best player higher lifts everyone.

City Battle PVP

The one rule that saves you gems: only the **first** capture of a city gives the instant bonus. Retaking a city gives none — so do not burn gems on extra march slots for a recapture. It still helps the alliance through the growth bonus and duel points.

▼ THE TWO CASES, STEP BY STEP

Case A — city with monsters. Everyone goes for the **small** ones first: one march each onto a *free* small monster, so points spread across the alliance. The big centre and the middle ones only on the commander's call. Once the big one is down to **25%**, everyone goes in together.

In more detail: the small ones can already be killed before the event. When the small one showing a percentage hits 50%, new small ones spawn — so clear small ones first, then that one. Then the medium-small ones until the city is at 75%, then down to 50%, and so on. From 25% and once the small ones are gone, the centre.

Case B — city held by an enemy alliance. Everyone hits it together until it is ours, then **everyone sends troops in to defend for 30 minutes**. After that it is ours.

Always: come to the rally point when R4 calls, and keep watching alliance chat — plans change on the fly.

Cave Conquest

ALSO GIVES DUEL POINTS

Defeat tunnel puppets, collect sandworm eggs, earn tunnel points **and alliance duel points**. One-hour blocks alternate between clearing puppets and taking the tunnel. **Each alliance can control only one tunnel at a time.**

▼ REWARDS AND THE THING PEOPLE GET WRONG

Personal milestone chests at 15,000 (manual ×2, 5-min speed-up ×5, supply box ×30), 30,000 (supply box ×40) and 60,000 (coin, manual ×2, hero figure ×1, speed-ups). Control rewards are distributed by R4 and above.

Common misunderstanding: the sandworm eggs are a **points collectible**, not something that hatches into a behemoth. Behemoths come from cells and serum, not from caves.

SOLO AND GROWTH EVENTS

☑ FROM PLAYERS ☑ TESTED IN GAME ☐ FROM THE INTERNET ☑ OFFICIAL SOURCE (PARTLY)

Mixed — see each event

Lost Frontier

10 TRIES A DAY

Beat **30 normal monsters per difficulty** to unlock the next one: Easy → Normal → Hard → Insane → Hell. You get **10 attempts per day**, reset at 00:00 UTC. Every fifth monster a supply hoarder appears — beat it with a raid. Use your **strongest team**, not a fixed formation.

THE MISTAKE

Burning attempts on a difficulty you cannot clear. You only unlock the next tier by clearing **all 30**. Raise heroes first, then push.

▼ THE HELP MECHANIC — THE MOST COMMON QUESTION

Asking for help happens **before** the raid starts, as an invitation; the rally only appears after the start. Two separate steps.

Find it via the green **Help** button in the event, or the small double arrows (») at the right edge of the chat banner — not by tapping the banner itself. To help others, look under the **Event** tab in the rally menu, not among normal rallies.

Honor Expedition

RESETS TUE / THU / SAT

Three battlefields, each giving **+20%** to one hero class: Mountain Citadel → Valor heroes, Howling Sands → Rogue heroes, Azure Apex → Flight heroes. Complete the challenge on each for glory coins.

TWO RULES THAT DECIDE YOUR WHOLE CYCLE

- **You pick a difficulty once and cannot change it.** Pick the highest you can clear *safely* — overreaching wastes the cycle.
- **Each hero can only be used on one battlefield per cycle.** Spread them deliberately.

- **The reward shown for a difficulty is the total of all 20 stations.** Each station pays its share, the last one the most. There is no extra bonus for finishing. If you get stuck near the end, you only miss the share of the stations you did not clear.
- **Playing a difficulty you already cleared again brings no progress.** The game lets you pick it, but warns that clearing it unlocks nothing new.

Mountain Citadel is the key: the other fields are gated behind its progress — Azure Apex stays locked until Mountain Citadel difficulty 13 is done. Push Mountain Citadel first. Spend glory coins on the best available gear rather than scattering them.

▼ REWARD TABLE BY DIFFICULTY

The pattern is identical on all three battlefields, so the table applies by tier. Coins rise by **+260 per tier up to T23**, then **+130 per tier**.

TIER	GLORY COINS	CHEST A	CHEST B	SCRAPS	SUPPLY BOX
1	2,080	5	1	62	25
5	3,120	5	5	120	25
9	4,160	2	5	178	25
13	5,200	2	5	224	50
20	7,020	5	5	247	50
25	8,060	5	3	268	75
32	8,970	5	1	310	100
70	11,830	6	6	416	175

Chest A is the rare honor chest, chest B the premium one; their drop tables are fixed regardless of tier — only the quantities change. Gear scraps give +100 EP when enhancing hero gear. A supply box is 10,000 units of **one** resource.

Pet Journey

PET EVENT

Bring any pet to the required level or star rating to earn adventure paths. The paths move your paw print along the map and unlock chests on the way. Unclaimed chests are mailed when the event ends — **unused paths are not**, so spend them before it closes.

> **THE OVERLAP WORTH PLANNING AROUND**
>
> Pet marks and pet food also score on duel day 2. When Pet Journey runs in the same week, do your pet levelling on duel day 2 and it counts twice.

The map: seven stops, each with a chest

Sawblade Waltz HERO EVENT

Spend **50 stamina** in the wilderness to get one sawblade. Use sawblades to summon marked elite infected, raid them with allies, and you have a chance at Lucky's shards. Enough shards unlock her.

> **THE OVERLAP WORTH PLANNING AROUND**
>
> Duel day 1 (Radar) rewards spending stamina. That is the same stamina you need for sawblades — so on Radar day, spend it deliberately and it counts twice.

Shard milestones sit on roamer levels 4, 7, 10, 13, 16, 19, 22, 25, 28 and 30. If you want Lucky, chase those. Raids are an alliance matter — say when you summon so it does not go to waste.

Progression Exchange 5 FREE SWAPS

A limited-time event that lets you **move progress from one hero to another** instead of losing it. Two modes:

- **Swap skill levels** between two heroes — their **maximum skill level has to be identical**.
- **Swap prestige gear levels** between two heroes.

> **WHY THIS MATTERS MORE THAN IT LOOKS**
>
> This is the one mechanic that undoes a bad investment. If you levelled skills or prestige gear on a hero you no longer field, the exchange moves that work onto the hero you actually use. **You get 5 free attempts** — do not let them expire, and think before you spend one, because the swap goes both ways.

Doomsday Express 4 + 4 PER DAY

Send your own trucks and raid other players' vehicles. **Four send attempts and four raid attempts per day**; delivery takes roughly 2.5 to 3 hours. Collecting a finished delivery does **not** cost an attempt.

▼ **WHAT YOU GET**

Your own delivery, collected: 800,000 food · 800,000 wood · 160,000 metal · 40,000 fuel · 15-min speed-ups ×3 · medals ×8 · cells ×2.

Raid rewards by class: A tends toward premium items, B toward large resources, C mostly speed-ups. The preview shows the defender's power before you commit — check it.

Underground Goldmine RUNS PERMANENTLY

Not an event — it runs the whole time and is simply a daily habit. Garrison a mine tile and it gathers gold while you do other things. Mines run level 1–6; levels 5 and 6 have a minimum recall time. Rare high-level mines are first come, first served. **Do not defend a low-value mine at the cost of two teleports.**

MINI-GAMES

☑ FROM PLAYERS ☑ TESTED IN GAME ☐ FROM THE INTERNET ☐ OFFICIAL SOURCE

Tested in game by the S1L team

Operation Abpraller

BOUNCE SHOOTER

A shooting mini-game with ricochets (name in the German client: **Operation Abpraller**). You find it in the event list behind the arrow button on the left side of your settlement. Every level gives you **5 bullets**: shoot every zombie and never hit a hostage (*HELP!*).

Tickets: a level only costs a ticket when you clear it. Failing or restarting is free — the ticket comes back. Tickets refill over time, and allies can send you tickets.

HOW TO WIN

- The aiming line only shows the **first** part of the path. Work out the bounces yourself: angle in = angle out.
- Bullets bounce off ceiling, floor, pillars, beams and platforms — often four to six times in one shot.
- **Moving parts** often start only after your first shot or after you hit a **lever**. Watch one full cycle before you shoot.
- After a shot there is a short reload. Two shots straight after each other do not work.
- The trophy button that appears after several failed tries skips the level, but it costs **two extra tickets**.
- After the last chapter you get **random challenges**. Leaving a level with the door button costs no ticket — skip hard levels and roll a new one.
- Daily tasks: ask the alliance for help once, collect one free ticket from allies, play 5 challenges, clear 8 levels.

Step-by-step solutions with pictures for chapter levels 4-10 and 5-1 to 5-10 (German): Downloads → Operation Abpraller.

RANDOM CHALLENGES: TESTED SOLUTIONS

- **1-1** — shoot up-right at the flat underside of the stone block; the bullet bounces down onto the zombie. One bullet.
- **1-2** — the platform on the ropes moves from side to side. Shoot its underside (middle) when it hangs between you and the pillar; the bullet drops over the pillar onto the zombie. One bullet.
- **1-3** — two shots slanting down at the wall: first to the right (right zombie), then to the left (left zombie). The moving roof parts do not get in the way.
- **1-5** — the windmill turns slowly and the zombie hides behind the pillar. Wait until one blade points straight to the left, then shoot steeply at its underside just left of the hub. The bullet drops behind the pillar and rolls into the zombie — give it a few seconds.
- **1-7** — first hit the button on the floor: it lifts your platform. Now shoot the top zombie straight on, then the barrel on the rack just over the corner of the platform. The blast takes out the last zombie.
- **1-9** — shoot the red lever on the cage flat: the cage goes up and a barrel stands under the top platform. Hit the left end of the platform's underside: the bullet drops onto the barrel and the blast kills two zombies. For the left zombie, hit the metal joint at the top left of the cage.
- **2-2** — hit the green switch on the pillar: both barrels slide onto the pillar under the three zombies. Shoot the left barrel — one blast, three zombies. Two bullets.
- **2-3** — hit the green switch on the post: a platform appears at the top. Shoot the left half of its underside for the back zombie, then a little steeper for the front one.
- **2-4** — shoot steeply into the floor right in front of your feet. The bullet bounces off the underside of the arch onto the zombie. One bullet.
- **2-7** — first shot flat and slightly down at the upright wall just **below** the corner of the slope (the corner itself misses) — middle zombie. Second shot very flat onto the upper slope: it falls onto the lower slope and rolls into the bottom zombie.
- **4-4** — a slat moves up and down. Right zombie: steeply into the floor, the bullet goes up through the gap between the triangles. Left zombie: flat at the outside of the right crate low down; it bounces back into the left crate while the slat is up.
- **5-9 with bombs** — shoot the bomb stack first to clear the way. Then flat just over the base for the bottom zombie, steeply into the floor between the cages to break the right chain, then the left chain, and last the underside of the top beam for the top zombie, over the hostage. Five bullets, no room for a miss.

HEROES AND TROOPS

☑ FROM PLAYERS ☑ TESTED IN GAME ☐ FROM THE INTERNET ☐ OFFICIAL SOURCE

Hero skill texts checked in game, 28 Sep 2026 · line-up second hand

The three hero tips below were checked in game on the hero screens (28 Sep 2026). The line-up comes from an experienced player on another state and is marked as second hand.

Three heroes whose prestige gear helps everyone

The prestige gear of **Rosie, Jacob and Chiron** carries a skill that raises the attack and defence of **all** heroes, not just the hero wearing it — in game: Rosie's guitar at level 3 gives +14% each, Jacob's pistol and Chiron's bow at level 1 give +10% each. Take that into account when you plan which prestige gear to upgrade first — spending there pays across your whole roster.

Rosie — prestige weapon

Jacob — prestige gear

Chiron — prestige gear

Chiron — passive skill

Lucky — passive skill

Chiron's passive works on the whole march

Chiron's passive *Penetrating Resonance* raises the attack and defence of all allies — at skill level 1 by 2% each, per the skill text in game. Members report that "allies" here means **the troops in the march**, not other players.

Lucky reduces what the wilderness costs you

Lucky's passive *Wild Hunt* is a global effect: it **lowers your stamina consumption** and raises your attack damage. At skill level 10 the game shows **−12.5% stamina** and **+4.3% damage**; each level adds a little more.

Upgrade her on the hero development day — the same action then scores duel points as well.

Turning an SR hero into an SSR hero

In some seasons an **SR hero can be upgraded to SSR**. The hero has to be at **10 stars** first. Which hero it is changes with the season: season 1 **Lucky**, season 2 **Sarge**, season 3 **Chef** *(players, official server)* — check the season screen in game.

After the upgrade the hero **restarts at 5 stars** and can be taken back to 10 with epic hero fragments — but at **double** the quantity. Total needed: **2,520 fragments**. Worth knowing before you commit, because it is a long road.

Do it on the hero development day and put **all your skill manuals** into that hero first. The upgrade gives the manuals back — so they score duel points twice and you can use them again on another hero. *(player: Feline, official server)*

A line-up reported from another state SECOND HAND

Passed on from an experienced player on state 48, so **not our own measurement**: main team **Chiron, Layla, Candy, Jacob, Becca**; second team **Ray, Tarzan, Tara, Rosie, Nikola**. Reported to reach roughly 250 million hero strength per march. Useful as a direction, not as a target to copy blindly.

Troops — and a warning about dismissing them

Duel day 5 is the troop day: you score as long as you have the space and the speed-ups to train.

> READ THIS BEFORE YOU DISMISS TROOPS TO FREE UP SPACE
>
> You reach your troops through the profile window, bottom left. Troops in the settlement can be reduced there.
>
> **The settlement window pre-selects every troop for dismissal.** Change the number by hand and dismiss in small steps. Dismissed troops lower your combat strength in the alliance ranking — this is one of the few actions in the game you cannot undo.

GEAR AND REFORGING

☑ FROM PLAYERS ☑ TESTED IN GAME ☐ FROM THE INTERNET ☑ OFFICIAL SOURCE (IN-GAME SCREENS)

Read from the German game interface, Aug 2026

Reforging rerolls the special values on a piece of gear. The interface shows you the probability before you commit, and the result can be better *or worse* than what you had. Check the value pool first — the screenshots below show where those numbers are.

HOW TO REFORGE WITHOUT WASTING IT

The value has to fit the hero. An excellent value for precision shooters does nothing on a guardian hero. Rare values are worth more than common ones — but only on the right hero.

Keep rolling until the result is better than what you had, then **save**. After saving you can carry on rolling and hope for something better still, without risking what you already banked.

THE PROBABILITIES — AND THE ONE RULE THAT FOLLOWS FROM THEM

Each reforge draws from a value pool. The chance of landing a higher tier is:

Common	45 %	Exquisite	30 %	Epic	20 %	Legendary	5 %

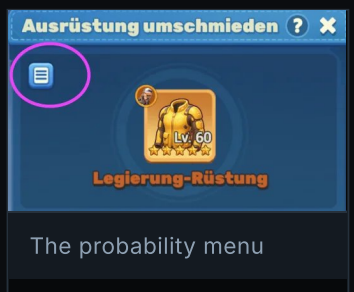

The game states that **the more often you reforge a piece, the higher its chance of getting higher-tier values**. So rolling is not a coin flip you repeat — it improves. That is the mechanical reason behind "keep rolling, save when it is better, then roll on".

GOLDEN GEAR

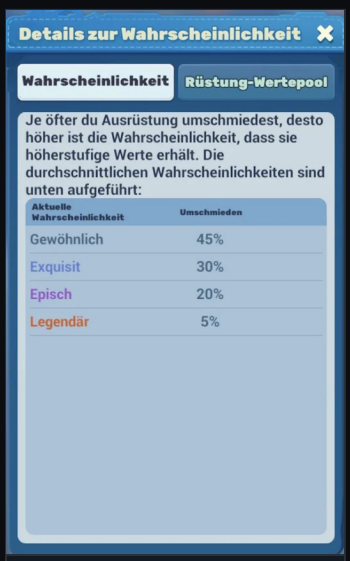

Golden gear can be strengthened with further golden gear.

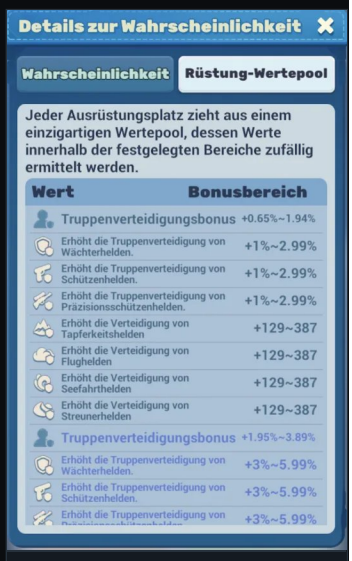

Where reforging starts

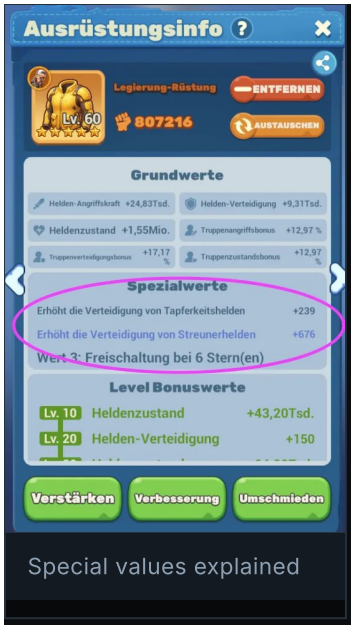

The probability menu

Probability display

The value pool you are rolling from

Special values explained

A result that improved

A result that got worse

Button labels differ between languages — the screenshots come from the German interface.

EVENT REGISTER — EVERY EVENT AT A GLANCE

Rhythm as seen on our state. Exact times are in the weekly plan on the alliance board.

EVENT	RHYTHM
Alliance Duel (VS)	weekly, days 1–6
Turbo Turtle	in some weeks, up to 7 day phases
Power Play	4-hour rounds, own calendar
Arcadian Conquest	weekly, 2 hours
Alliance Siege	weekly, 5 fight days
Ghoulion Pursuit	several times a week, 30 min
Reservoir Raid	weekly, 30 v 30
Oil / Gene / Copper Clash	in the season
City Battle	in the season
Cave Conquest	when it runs
Lost Frontier	daily, 10 attempts
Honor Expedition	resets Tue / Thu / Sat
Doomsday Express	daily, 4 + 4
Underground Goldmine	always
Pet Journey · Sawblade Waltz · Progression Exchange	when they run
3v3 Arena	daily, 5 free fights

GLOSSARY — THE SAME THING IN THREE LANGUAGES

The German names are the ones the game uses. Russian names are our own translation and may differ from the Russian game client.

DE	EN	RU

WHERE TO LOOK THINGS UP

☑ FROM PLAYERS ☐ TESTED IN GAME ☑ FROM THE INTERNET ☐ OFFICIAL SOURCE

All sources opened and checked 15 Sep 2026

24Gaming4Fun — YouTube

youtube.com/@24Gaming4Fun

+ GOOD FOR

- New updates and seasons, usually within days.
- Seeing an event played instead of described.

– WEAK AT

- Looking one thing up quickly — it is video.
- One player's opinion, not verified data.

dandangers.ru — another alliance's wiki (Russian)

dandangers.ru

+ GOOD FOR

- The deepest written guides anywhere — 18 of them plus data tables.
- Long-term free-to-play build planning.

– WEAK AT

- Russian only — use your browser's translate button.
- No update dates, and it reflects their state, not ours.

TilesSurvive.net — fan database

tilessurvive.net

+ GOOD FOR

- Numbers: hero EXP, star tables, skill books, VIP points.
- Two working tools: event helper and speed-up calculator.

– WEAK AT

- No update date anywhere, so values may be old.
- Faction names differ from the ones in game.

Official strategy guide (Tiles Survive community)

ts-community.kingsgroupgames.com — opens inside the game

+ GOOD FOR

- Approved by the game team: anchors, roles, hideout values and a daily plan for the Oil and Gene Clash.

– WEAK AT

- Its power limits for small, medium and large do not fit every alliance — we measure against our opponents.
- Only opens through the game app, not in a normal browser.

Official Tiles Survive Discord

discord.com/invite/tilessurvive

+ GOOD FOR

- Getting one specific question answered fast.
- Patch news arrives there first.

– WEAK AT

- Answers are unverified opinions.
- Very busy — things scroll away.

PocketGamer hero tier list (editorial, not players)

pocketgamer.com/tiles-survive/tier-list/

+ GOOD FOR

- A first orientation if you are new.
- It states its date and game version — most pages do not.

– WEAK AT

- An editor's opinion with no method shown.
- No season or time-limited content.

DO NOT USE THESE — AND DO NOT BUY FROM THEM

TOPUPlive, Packsify, LDShop, LootBar, BuffHub, GamsGo and similar sites all sell in-game currency. Their "guides" exist to bring you to their checkout.

More importantly: FunPlus's own terms say item licences *"may only be purchased from us or our representatives through the Games or as otherwise expressly authorised"*, and reserve the right to reverse payments and close accounts. **Buy waypoints only in the game or at the official FunPlus top-up centre.** A few euros saved is not worth your account.

HOW TO READ THE CONFIDENCE STRIP

Every section starts with a row of ticked boxes. It tells you where that information comes from, so you can judge it yourself instead of trusting it blindly.

✓	**From the internet** — found on guide sites. Useful, but nobody checked it for us.
✓	**Official source** — from FunPlus, patch notes, or a rules screen inside the game.
✓	**From players** — from people who actually play, including our own members.
✓	**Tested in game** — somebody opened the screen and confirmed it. The strongest tick.

More ticks means more solid. A section with only the first box ticked is still worth reading — it just means: try it, do not bet the week on it.

HELP FIX THIS PAGE

If you open a screen in game and the numbers differ from this page, post a screenshot in alliance chat. That is how a box earns its "tested in game" tick. There is a list of open questions in every detail block — corrections are more welcome than praise.

Where this comes from: [S1L]'s own event notes and in-game screenshots taken by our members, plus the external sources listed above. No text was copied from other guides. Point values were read from German-language screens and may be worded differently in your language.

What this page deliberately does not contain: dates and schedules. Those change every week and are announced on the alliance board in game. · [S1L] Field Guide · version 3 · 28 Sep 2026
